Raleigh, NC

Skills & Knowledge

Programming Languages
Ruby | Go | JavaScript | TypeScript
Python | SQL | HTML | CSS/SCSS

Libraries & Frameworks
Ruby on Rails | React | FastAPI | Node.js
Tailwind | Bootstrap | Protocol Buffers

Software Design Principles
System Design | Data Modeling | UI/UX
Project Management | REST & RPC APIs
Event Stores

Other Tools
Claude Code | Cloud Agents | Redis | Git
Figma | Heroku | Docker | Kafka
Datadog | Sentry

Education

College of Charleston, SC 2018
B.S. Computer Science
Mathematics Minor

Other Interests

Fantasy World-Building
PC & Tabletop Gaming
Architecture & Interior Design
Music & Composition
Food & Cooking
Coffee Brewing

Summary

Detail-oriented Senior Software Engineer with 10 years of experience leading and working with teams to design, build, and deploy web applications at scale in multiple languages and frameworks. I pride myself on building beautiful, intuitive experiences that bring joy to users, backed by performant and maintainable code that ensures longevity for my team.

Experience

Tern
Senior Software Engineer Dec 2024 - Apr 2026
Remote
Ruby on Rails | Hotwire | Stimulus | Tailwind | PostgreSQL

- Drove iterative full-stack projects from inception to finish on a fast-paced weekly release cadence that showed our commitment to getting products into the hands of our users.
- Collaborated with our design team to implement new components for our modular in-house Design System and make our UI cleaner and more intuitive.
- Utilized AI tools such as Cursor, Claude Code, and cloud agents to optimize and parallelize work with the goal of doubling output without sacrificing on quality.
- Facilitated a weekly engineering forum where we discussed new tools and improvements to our processes.

GitHub
Senior Software Engineer Aug 2022 - Nov 2024
Remote
Ruby on Rails | Go | TypeScript | React | Protocol Buffers | Kafka

- Built new tools and services in GitHub's monolith and microservices connected by Kafka event stores and integrated with Zuora and Azure.
- Led initiatives to create a new billing UX and underlying billing platform as well as other projects across GitHub's billing and payments domain.
- Modeled for both relational and non-relational data at enterprise scale on top of MySQL and Cosmos DB.
- Facilitated team retros and discussions to improve how the team works together socially and technically.
- Mentored other engineers through pairing, discussions, and presentations.

Dutchie

Senior Software Engineer II — Nov 2021 - Jul 2022

Remote

Ruby on Rails | React | TypeScript | Protocol Buffers

- Architected the user experience, services, and data models supporting Dutchie's in-house payments platform, Dutchie Pay.
- Drafted engineering project blueprints from product specifications and design mock-ups, and consult on blueprints from other teams.
- Assisted product & design with managing project boards, timelines, and allocating developer resources.
- Drove incident response and managed releases and deployments for the payments team using Heroku Enterprise.
- Mentored and provided guidance to other members of the engineering org.

Senior Software Engineer I — Mar 2021 - Nov 2021

Remote

Medical University of SC

Senior Web Developer — Jan 2020 - Feb 2021

Remote

Ruby on Rails | JavaScript | HTML/CSS | Bootstrap | MySQL

- Collabored with Project Managers and Doctors to build web apps that improved and assisted medical research processes.
- Led multiple projects to modernize our front-end UI/UX across various apps.
- Improved application performance by implementing caching and query optimization.

Web Developer — Oct 2018 - Dec 2019

Remote

Intern Web Developer — Jun 2015 - Sep 2018

Charleston, SC

Special Projects

The Classic+ Project [WoWClassic.Plus](https://wowclassic.plus)

Lead Developer Oct 2025 - Present

React | Python | FastAPI | PostgreSQL | MaterialUI

- Collaborated with three other engineers and a team of artists and designers to build a fan site for the World of Warcraft Classic community to organize and share their ideas for a highly-speculated upcoming World of Warcraft Classic release.
- Worked with our non-technical Project Leads to understand and materialize their vision for the site.
- Designed highly-stylized UIs that mimic portions of the in-game UI, including the World Map, Character Creation screen, and Quest Log.
- Set up the site's hosting on DigitalOcean and Cloudflare to support a peak of over 200,000 users.

WoWSims [WoWSims.com](https://wowsims.com)

Admin & Open-Source Developer Oct 2022 - Present

Go | TypeScript | JSX | Protocol Buffers | Web Assembly

- Collaborate with a community of open-source contributors to build web tools that simulate World of Warcraft Classic gameplay in order to help players make decisions about how to prepare and play their characters.
- Lead the process of launching new tools for each release from the World of Warcraft Classic team supporting a peak of over 500,000 yearly active users.
- Over 5000 personal commits and 100,000 lines of code changed.
- Incrementally redesigned the WoWSims UI to modernize the experience and enable our team to build new features that give more power to our users.
- Manage our GitHub organization and the site's hosting on Cloudflare.
- Provide updates, troubleshooting, and manage relations with our player community in our Discord server and across multiple external servers.
