EXPERIENCE

Medical University of SC — Senior Web Developer

January 2020 - PRESENT - Charleston, SC

- Develop and manage multiple open-source web applications under MUSC.
- Collaborate with stakeholders to plan new features, sprints and releases.
- Manage storyboards, pull requests, and code deployments to meet sprint deadlines.
- Delegate tasks and deliver team progress reports during weekly sprint meetings.
- Perform thorough review and provide feedback on all code contributions.
- Train new developers and provide advice, support, and guidance as needed.
- Design and update interfaces according to UX and accessibility principles.
- Refactor back-end architecture to improve performance of applications.
- Oversee comprehensive automated testing using continuous integration.

Medical University of SC — Web Developer / Intern

June 2015 - December 2019 - Charleston, SC

- Collaborated with a team of developers, analysts, and contributors to develop the full stack of open-source web applications for MUSC.
- Interfaced with analysts to devise new requirements for and make improvements to existing applications.
- Led multiple projects to improve front-end interfaces and back-end architectural performance.
- Wrote comprehensive automated unit and integration tests.
- Started as a full-time developer in the same role in October 2018.
